

VEHICLE DETAILS

1984 PORSCHE 911 (930) Turbo Flachbau “ohne Klappscheinwerfer”

A special wish that came true

Between 1981 and 1982 Porsche Exclusive created 58 hand-built units of the 930 Turbo Flatnose (Flachbau) without Pop-Up headlights. In spring 1984 a well-known Porsche collector and Magnat from Kuwait insisted on getting a tailor-made, unique unit 59 made for him, with paint to sample color (PTS) atlas-grey and cream white leather interior. During the first Gulf war in 1990, the car was brought back to Germany where it was registered, driven, and enjoyed by a Dentist before he sold it to the 3rd and current owner. I have original German Fahrzeugbrief.

After intensive, 3 months study of the paperwork, research and verification, we can assure you that this is really a one-off unit, number 59 of 59, only one build in PTS in that color and only produced in 1984 (2 years after regular production was completed with 58 units) by the “special wish department” (now Porsche Exclusive) in Zuffenhausen to satisfy a Porsche Collector. Matching numbers car. Never advertised before. Exclusively only available from us.
